INSURANCE ESTIMATING SYSTEM

IP Risk Services is proud to offer our clients three of arguably the most **sophisticated** Insurance Rating Estimating Systems and Experts available in the World today.

- Core Logic Company
- RS Means Building Construction Cost Data
- IP Risk Services Expert/Licensed Staff

IP Risk Services has been granted a License by the Core Logic Company to utilize and offer the **Commercial Building Insight/Rating** Estimating System.

This system utilizes a “**component by component**” study of **Material & Labor costs**. Each component is judged individually such as foundations, exterior walls, under air etc. This type of approach is many times **more accurate** than the often used inexpensive General Book system that utilizes General local multipliers.

CBI is an inductive estimating product which analyzes user input to automatically select **component** costs for walls, doors, windows, roof cove and the like. When grouped together, multiple assemblies become systems of the building, such as the Exterior Wall, Roof, Partition, HVAC or similar. When the building systems are added together, inclusive of other “**soft costs**” of construction like **Overhead & Profit (OH & P)**, fees and permits, architects fees, and similar, respective costs are used to develop a profile for a particular type of Building.

CBI continuously monitors advances in building construction methods to ensure component parts of our estimating system reflect current construction techniques.

When new techniques and specifications become main-stream practice, it can affect the component selections of the system and ultimate amounts produced.

The **CBI** system **Updates** all **Material & Labor** changes every three months.

CBI continually researches labor, material and equipment costs (“hard costs” of construction) plus mark-ups, taxes, insurance, fees and permits and other fringes delivered for reconstruction work for the insurance industry in the United States and Canada. Over 50 research professionals, the largest force in the industry, monitor data from nearly 3,000 areas in the United States.

IP

General Conditions

The following information and definitions have been compiled by the RSMeans company.

The RSMeans company is recognized as a top leader of providing insurance Replacement cost information to the insurance industry for many years.

Since 1942, RSMeans has been actively engaged in construction cost publishing and consulting throughout North America.

OVERHEAD & PROFIT

General contractor overhead includes indirect costs such as permits, workers compensation, insurances, supervision and bonding fees.

Overhead COSTS WILL VARY with the size of the project, the contractor's operating procedures and LOCATION.

PROFIT WILL "VARY" WITH ECONOMIC ACTIVITY AND LOCAL CONDITIONS.

In ALL situations, the inspector should give consideration to possible adjustment of the factors used in developing the Commercial/Residential models.

ARCHITECTURAL FEES

Typical Architectural Fees may "VARY" depending upon the degree of design difficulty and ECONOMIC CONDITIONS in any particular area.

Various portions of the SAME project requiring different percentages should be adjusted proportionately.

General Conditions

CONTINUED

IP NOTE

The above guidelines have been the basis and foundation of providing ACCURATE insurance estimates in the insurance industry for many years.

The above guidelines are common sense. They prove that there is NOT any type of “Standard” percentages that must be utilized when compiling an accurate insurance estimate.

Professional and ethical insurance estimating companies must take the time/effort needed to compile the correct replacement costs of a particular location.

This time/effort procedure always reveals different replacement costs percentages based on economic conditions and location.

Professional insurance estimating companies should never let any person or any type of “entity” dictate to them the percentages that must be utilized in the production of an accurate insurance estimate.

Professional insurance estimating companies must maintain the identity as an “unbiased disinterested third party opinion” and not yield to pressure from any other entity.

Parties and Entities (such as Insurance Companies) that have a **vested** interest are not; nor have they ever been considered an unbiased source of true replacement costs since they have an interest in the outcome of an insurance estimate.

This fact has been proven many times in the legal system.

Property Owners should always seek an insurance replacement cost estimate from an unbiased disinterested legitimate third party professional company.

IP Risk Services has always abided by the industry guidelines that have been eloquently stated by the RSMeans Company.

IP Risk Services has always maintained the highest integrity as an unbiased disinterested third party opinion.

IP Risk Services does **not** and will never have any type of **vested** interest in the properties that we provide insurance estimate opinions.

IP

IP Risk Services, Inc.

Time-Location Multipliers

IP Risk Services also utilizes the inductive method of cost compilation to help **confirm** our findings. In this method, wage rates, material prices and other base costs are combined into unit-in-place costs, which are then grouped into component-in-place costs.

This check system utilizes time-location multipliers to adjust building base costs to **local costs** and the current **date** of the study.

Time-location multipliers and **local economic conditions** are monitored continuously by our “on the ground in the market” **IP Personnel**. This monitoring staff may consist of a Licensed General Building Contractor, Licensed All Lines Commercial Property Adjuster, Licensed Certified Commercial Appraiser and Licensed Insurance Agent.

New Building Codes

One of the most overlooked insurance situations in a serious loss involves **new building codes and local ordinances** that may have been updated, changed or even added since the original construction of a building.

A further insurance situation involves **debris removal** after a serious loss. Debris from a loss must be removed before re-construction can begin.

New building codes and debris removal can sometimes be very costly and often overlooked by all parties involved in an insurance loss.

It is in the best interest of the insured to have an **estimate** for these two hazards even if the policy covers this cost.

IP **EXCLUSIVELY** offers a “**Theoretical Value Estimate**” for current building codes and debris removal.

Our 31 years of experience in the Florida market has enabled us to develop an exclusive formula for estimating these two important costs.

Just request us to provide you with this exclusive service.

LIMITING CONDITIONS

This insurance inspection report is based on the data collected on the inspection date. No consideration has been given to material premiums and additional items needed to conform to building codes, ordinances; or demolition in connection with reconstruction or the removal of destroyed risk items. The **value of the land** and site improvements have **not** been included. No responsibility is assumed for legal matters, questions of survey, opinions of title, soil or sub-soil conditions, engineering or other technical matters. **This report is not a Real Estate Appraisal. Insurance report only.**

The conclusions in this report are estimated under **normal market** conditions and is considered appropriate for proper normal insurance coverage. **Natural disasters** may drastically **increase** the cost of construction and is **not** feasible to properly estimate. This report does **not** take into consideration cost increases due to any type of abnormal weather and/or abnormal other conditions.

This insurance inspection report is not a guarantee or warranty of any kind. We do not assume any liability for damages which may result from this report. We are not responsible for conditions this report fails to disclose. The report is valid for one year. This insurance inspection report should be updated at least once a year.

Neither our employment nor our compensation in connection with this report is in anyway contingent upon the conclusions reached; this report sets forth all the assumptions and limiting conditions affecting the analysis, insurable analysis and conclusions contained herein; I P Risk Services, Inc., makes no warranties or representations regarding the insurance report conclusions found in this report.

The authors of this report shall not be required to give testimony or appear in court or at any administrative proceeding relating to this inspection report. Construction replacement cost value can be provided by a variety of professionals and as such is not within the definition of appraisal practice. This opinion is from the ASB.

The Association, by accepting this insurance report, agrees to release IP from any claims, demands or damages. The Association, in consideration of IP performing the insurance analysis report, hereby agrees to indemnify, defend and hold harmless IP Risk Services, Inc., from and against any and all liability, damages, losses, claims, demands or lawsuits arising out of or relating to this insurance analysis report. Acceptance of and use of this report constitutes acceptance of the above statements.
